

PRODUCT DATA SHEET

ICONIC SUEDE RED WNS LOW

ASTM F2413-18 EH

ASTM F3445-21 SR

Art. No. 640135

Protection: composite fiberglass toe cap

Upper: high quality suede leather

Lining: BreathActive functional lining

Footbed: evercushion® RELIEF

Sole: HERITAGE Sole - 572°F heat resistant rubber outsole with excellently slip resistant herringbone pattern and idCELL elements [meets ASTM F2913-19 non slip testing standards and ASTM F3445-21]

Color: red

Sizes: 5 - 10, 11

RUBBER SOLE HERITAGE

The 572°F heat-resistant rubber outsole has an excellently slip resistant herringbone pattern with optimum grip. The softer rubber midsole grants underfoot cushioning and shock absorption. By increasing the rotation point, friction and thus fatigue are greatly reduced. The wide frame ensures all-around perfect stabilization.

EVERCUSHION® RELIEF

Maximum performance for your work shoes. The contoured evercushion® RELIEF footbed follows the shape of the foot and ensures pressure relief. A specially coordinated arch support enables the foot to be positioned naturally in the shoe and stimulates the muscles when walking. A layer of a particularly soft and stable foam guarantees extra cushioning and thus superior shock absorption. Grooves on the underside of the insole ensure that the sole does not slip in the shoe. Comfort and support to get your job done.

ROTATION POINT

The special feature of the sole is the integrated rotation point. This point in the area of the inner metatarsus is the most severely strained part while walking. By reinforcing the rotation point, friction and thus fatigue is greatly reduced.

idCELL

The large idCELL elements in the heel and forefoot area consist of a very soft, shock absorbing EVA material. They perfectly absorb impacts and shocks e.g. when the heel strikes the ground.
